

The **Energie' Botanicals Calming Rose Facial Cleanser** does not contain any CBD. Therefore, there is no CBD Analysis available for review.

Our Cleanser formulation is developed without CBD by design.

Many companies market cleansers containing CBD but to be quite honest, during the cleansing process, none remains on the skin long enough before being washed off to penetrate the epidermis.

CBD needs to be ingested or massaged into the skin in-order for a client to realize any true expected benefit.

That said, we trust you will incorporate both our **CBD (PCR) Oil Serum Therapy** and our **CBD (PCR) Crème** as part of your daily after-care skin recovery regime. Dedication to maintaining your new skin with our complete line of

intense™ CBD Aftercare Products

will yield all the benefits our science-based premium products offer.
